- Let your guests leave you comments on your posts!** points to the '10 messages/leave message' link at the bottom of the post.

# 7- Counter Static

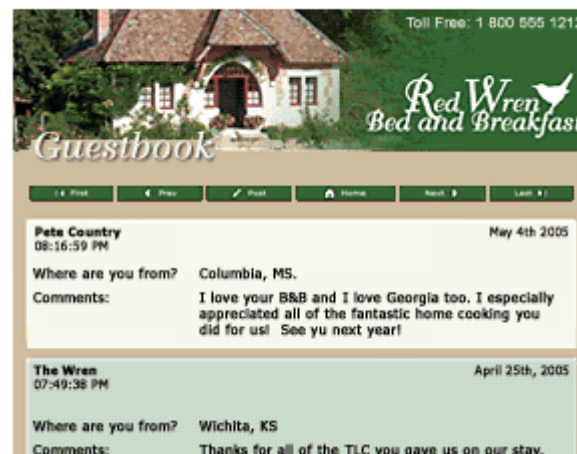

Track and graph your website traffic.

## 8- Guestbook

A **guestbook**, in the context of an Internet website, is a type of *logging system* that allows visitors to a website indicate that they have visited. Also, it is possible in some guestbooks for visitors to express their thoughts about the site or its subject. Generally, it does not require the poster to create a user account, as it is an informal method of dropping off a quick message.

# 9- Horoscope

Daily Horoscopes on your web site.

**Horoscope - August 23rd, 2005**

**Pisces** (Feb 20 - Mar 20) - You feel that the system you must live in isn't working well. Thoughts of independence are hampered by an inability to formulate a viable alternative. You're challenged to make small but radical changes.

## 21- Mailing List

A **mailing list** is a collection of names and addresses used by an individual or an organization to send material to multiple recipients. The term is often extended to include the people subscribed to such a list, so the group of subscribers are referred to as "the mailing list", or simply "the list".

*At least two quite different types of mailing lists can be defined:* the first one is closer to the literal sense, where a "mailing list" of people is used as a recipient for newsletters, periodicals or advertising. Traditionally this was done through the postal system, but with the rise of e-mail, the electronic mailing list became popular.

When similar or identical material is sent out to all subscribers on a mailing-list, it is often referred to as a mailshot or blast. A list for such use can also be referred to as a distribution list.
